

Contents of Volume 56

Number 1

- 1 An Application of a Bayesian Approach to the Combination of Measurements of Different Accuracies
M. HAIM, M. JAEGER & D. TZIDONY (Israel)
- 5 Human Errors and Work Performance in a Nuclear Power Plant Control Room: Associations with Work-related Factors and Behavioural Coping
L. J. KECKLUND & O. SVENSON (Sweden)
- 17 A Decision-oriented Measure of Uncertainty Importance for Use in PSA
K. PÖRN (Sweden)
- 29 Using Higher-level Failure Data in Fault Tree Quantification
H. F. MARTZ & R. G. ALMOND (USA)
- 43 Reliability Characteristics of Components and Systems with Tolerable Repair Times
J. K. VAURIO (Finland)
- 53 Sensitivity Computation of Reliability Markov Models Using the Uniformized Power Method
H. ABDALLAH (France)
- 61 An Imprecise Dirichlet Model for Bayesian Analysis of Failure Data Including Right-censored Observations
F. P. A. COOLEN (UK)
- 69 Probabilistic Safety Assessment Improves Surveillance Requirements in Technical Specifications
M. ČEPIN & B. MAVKO (Slovenia)
- 79 On Time-dependent Availability and Maintenance Optimization of Standby Units Under Various Maintenance Policies
J. K. VAURIO (Finland)
- 91 System Degraded Availability
A. SOLS (Spain)
- 95 Letter to the Editors
B. REISER (Israel)
- 97 Calendar

Number 2

- 101 Analytic Method to Break Logical Loops Automatically in PSA
JOON-EON YANG, SANG-HOON HAN, JIN-HEE PARK & YOUNG-HO JIN (Korea)
- 107 The Development of a Nuclear Chemical Plant Human Reliability Management Approach: HRMS and JHEDI
B. KIRWAN (UK)
- 135 An Engineering Method for Reliability Analyses of Mechanical Structures for Long Fatigue Lives
J. LIN & J. PAN (USA)

- 143 A Reliability Study of a Fokker F-27 Airplane Brakes
A. Z. AL-GARNI, A. Z. SAHIN & A. A. AL-FARAYEDHI (Saudi Arabia)
- 151 Parametric Study of Sectional Models Involving Two Weibull Distributions
D. N. P. MURTHY & R. JIANG (Australia)
- 161 The Role of NHPP Models in the Practical Analysis of Maintenance Failure Data
J. L. COETZEE (South Africa)
- Technical Note**
- 169 Availability and Mean Life Time Prediction of Multistage Degraded Systems with
Partial Repairs
H. PHAM (USA), A. SUPRASAD & R. B. MISRA (India)
- 175 Book Review
P. C. CACCIABUE (Italy)
- 177 Calendar

Number 3

Special Issue
Reliability of Composite Materials Components

- 181 Editorial
- 183 Review of Probabilistic Models of the Strength of Composite Materials
L. S. SUTHERLAND & C. GUEDES SOARES (Portugal)
- 197 Statistical Properties of Hybrid Composites: Asymptotic Distributions for Strain
D. G. HARLOW (USA)
- 209 A Comparative Study of Failure Criteria in Probabilistic Fields and Stochastic Failure
Envelopes of Composite Materials
H. NAKAYASU & Z. MAEKAWA (Japan)
- 221 Regularity of the Transverse Crack Spacing in a Damaged Laminate
R. C. WETHERHOLD & D. J. THOMAS (USA)
- 225 Ultimate Strength Properties of Fiber-Reinforced Composites
F. HILD & P. FEILLARD (France)
- 237 Probabilistic Analysis of Delamination Onset in Linear Anisotropic Elastic and
Viscoelastic Composite Columns
H. H. HILTON, S. YI & M. J. DANYLUK (USA)
- 249 Reliability of High Performance Fibre Composites
L. SENTLER (Sweden)
- 257 Reliability of Imperfection-Sensitive Composite Shells via the Koiter-Cohen Criterion
G. CEDERBAUM & J. ARBOCZ (The Netherlands)
- 265 Free Vibration and Reliability of Compositized Cantilevers Featuring Uncertain
Properties
D. H. OH (Republic of Korea) & L. LIBRESCU (USA)
- 273 Design of a Composite Structure to Achieve a Specified Reliability Level
C. BOYER, A. BÉAKOU & M. LEMAIRE (France)
- 285 Reliability-Based Optimization of Fibrous Laminate Composites
M. MIKI, Y. MUROTSU, T. TANAKA & S. SHAO (Japan)
- 291 Calendar
- 295 Contents of Volume 56
